AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms*.

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

1986 Officers

John A. White, Chairman, Board of Governors
Richard W. Karn, Chairman-Elect
James Y. Oldshue, Past Chairman
Richard J. Gowen, Secretary/Treasurer
Daniel de Simone, Executive Director

ENGINEERING MANPOWER COMMISSION

The Engineering Manpower Commission (EMC) has been a source of objective, timely data on questions relating to the supply and demand for technological personnel since its organization in 1950. As an AAES Commission, EMC is composed of volunteers from professional engineering societies, academia, government, and industry, supported by a professional staff headed by AAES' Director of Manpower Studies.

EMC conducts annual surveys of industry and schools of engineering, monitors trends in the supply of and demand for engineers, and produces annual reports on engineering enrollments, degrees, and salaries. In addition to its statistical studies, EMC also produces the *Engineering Manpower Bulletin*, which assesses trends in the engineering workforce including participation in the profession by women and ethnic minorities.

1986 Officers

Donald G. Schroeter, Chairman
Paul Wood, Vice Chairman
Eugene T. Daniel, Vice Chairman
E. T. Kirkpatrick, Chairman, Education Committee

AAES Staff

R.A. Ellis, Director, Manpower Studies
Gordon Davis, Director of Publications

ACKNOWLEDGEMENTS

The Engineering Manpower Commission wishes to express its grateful appreciation for the cooperation of the hundreds of deans and other college officials who provided the data on which this report is based.

INTRODUCTION TO VOLUME II

This is the 18th in a series of annual reports from the Engineering Manpower Commission (EMC) on enrollment in engineering and engineering technology in the United States. Volume I of the study covers engineering; Volume II covers engineering technology. All data for enrollment as of Fall, 1985.

The remainder of this introduction deals only with the data on engineering technology programs contained in Volume II. A separate introduction to Volume I provides information on the statistics for engineering.

The Volume II report provides detailed summaries of engineering technology enrollment for all students and for women, Blacks, Hispanics, American Indians, and Asians/Pacific Islanders. Data on foreign nationals, also presented in the reports on engineering curricula, are not obtained in EMC's surveys of engineering technology programs.

Separate tabulations are presented for programs at the associate and bachelors levels. Data for full-time students are presented by year of enrollment in school. Full-time postgraduate students are also tabulated. Part-time students are tabulated separately, regardless of their year in school.

Two basic types of tabulations are provided, in addition to selected summary tables. The first deals with overall enrollment, across all curricula, for each school of engineering technology covered in this report. Schools are listed alphabetically by state. These data provide basic institutional and geographic measures of participation in engineering technology programs.

The second type of tabulation provides detailed statistics on enrollment for each major type of engineering technology program (civil, computer, construction, etc.). Within each of these broad groups, specific program titles that are assigned by schools to their curricula are also tabulated. For example, readers wishing to learn about enrollment at the associate level in surveying technology can check for programs of that kind within the more general category of civil engineering technology curricula. The tabulations by type of program retain details about the curricula of particular schools. Summary tables provide more compact accounting for total enrollment, across all schools, in each of the major technology disciplines.

COVERAGE AND RESPONSE

The statistics in this volume reflect engineering technology enrollment at 200 institutions of higher education in the United States. These schools include 157 of the 191 colleges and universities that had at least one engineering technology program approved for the 1985-86 academic year by the Accreditation Board for Engineering and Technology (ABET). (In these counts of accredited schools, all campuses of the Pennsylvania State University are treated as a single institution.)

Although EMC believes that these data represent a majority of the students in two-year and four-year engineering technology programs, they do NOT include all such students in the nation. The Commission has never attempted to provide comprehensive coverage of all technology programs, although this could change in future surveys.

A more likely development is more rigorous coverage of engineering technology programs at those schools with ABET-accredited curricula. The numbers of these schools are growing rapidly.

Many of the institutions with engineering technology programs are traditional four-year (or more) colleges and universities. Many others, particularly those offering only associate-level programs, are community or junior colleges.

Of the 200 institutions covered by this report, 163 actually responded to EMC's survey of 1985 enrollment. Enrollment at the remaining 37 schools was estimated by utilizing 1984 enrollment survey responses. Substitution of previous-year responses for missing data is standard practice in EMC's surveys of enrollment. For reports on engineering technology, only ABET-accredited schools are substituted, and substitutions are never allowed to go beyond the previous year. A list of the 37 institutions treated with substituted 1984 responses is provided in Exhibit 1. A separate list of the 34 ABET-accredited schools that were not included in the enrollment surveys in either 1984 or 1985, and which are therefore missing from the data altogether, is provided in Exhibit 2. In some cases, these schools were missing from EMC's mailing lists, so they had no opportunity to participate. All of them will be covered in the canvass of schools for the 1986 survey.

Of the schools without ABET-accredited technology programs that responded to the 1985 survey, seven had not participated in 1984. On the other hand, 22 of the non-ABET accredited schools with technology curricula that did participate in 1984 dropped out in 1985.

Exhibit 1

SUSTITUTIONS: 1984 DATA USED IN PLACE OF MISSING 1985 RESPONSE

Bronx Community College (New York)
California Polytechnic State University, San Luis Obispo
California State University, Sacramento
City College of New York (CCNY/CUNY)
Colorado Technical College
Del Mar College (Texas)
Eastern Maine Vocational Technical Institute
Erie Community College (New York)
Guilford Technical Community College (North Carolina)
Hartford State Technical College (Connecticut)
Hawkeye Institute of Technology (Iowa)
Louisiana Tech University
Mohawk Valley Community College (New York)
Monroe Community College (New York)
New Hampshire Technical Institute
New Jersey Institute of Technology
New York City Technical College
Norwalk State Technical College (Connecticut)
Owens Technical College (Ohio)
Phoenix College (Arizona)
Prince Georges Community College (Maryland)
Rochester Community College (Minnesota)
Rochester Institute of Technology (New York)
Savannah State College (Georgia)
SUNY AT&T College at Alfred (New York)
SUNY College at Buffalo (New York)
Temple University (Pennsylvania)
Trenton State College (New Jersey)
Tri-Cities State Technical Institute (Tennessee)
Tri-County Technical College (South Carolina)
University of Akron (Ohio)
University of Dayton (Ohio)
University of the District of Columbia
University of Houston (Texas)
University of Nevada at Reno
Weber State College (Utah)
Wake Technical College (North Carolina)

Note: In EMC's surveys of engineering technology enrollments, substitutions are made only when schools have one or more ABET-accredited curricula.

Exhibit 2

MISSING DATA: ABET-ACCREDITED SCHOOLS OF ENGINEERING TECHNOLOGY NOT INCLUDED IN THE 1985 SURVEY OF ENROLLMENTS

Atlantic Community College (New Jersey)
Auburn University (Alabama)
Central Maine Vocational Technical Institute
City College of San Francisco (California)
College of Staten Island (New York)
Glendale Community College (Arizona)
Greenville Technical College (South Carolina)
Houston Community College (Texas)
Hudson County Community College (New Jersey)
Hudson Valley Community College (New York)
John Tyler Community College (Virginia)
Longview Community College (Missouri)
Mankato State University (Minnesota)
Mercer Community College (New Jersey)
Montgomery College (Maryland)
Murray State University (Kentucky)
Northrop University (California)
Ocean Community College (New Jersey)
Oregon Institute of Technology
Portland Community College (Oregon)
Ricks College (Idaho)
Roane State Community College (Tennessee)
Sinclair Community College (Ohio)
South Carolina State College
State Technical Institute at Knoxville (Tennessee)
SUNY A & T College at Utica (New York)
SUNY A & T College at Farmingdale (New York)
Technical Career Institute (New York)
Tri-State University (Indiana)
University of Delaware
University of Hartford, Ward Technical College (Connecticut)
University of Houston Downtown Campus (Texas)
Walters State Community College (Tennessee)
York Technical Colege (South Carolina)

Note: EMC does not form estimates of missing data in its surveys of enrollment in engineering technology.

ERROR CHECKING

The data presented in this report are subjected to intensive error checking, including line-by-line comparisons with prior-year data and checksum comparisons on data entry. Apparently dramatic shifts in the data from one year to the next often prove to be indicators of data entry errors or of changes in reporting criteria at the level of particular institutions. Error checking has caught and removed many problems of the former type.

Uncertainties about just what constitutes an engineering technology program make the second type of problem, that of shifting standards for judging which curricula are to be reported, particularly acute for this portion of EMC's annual enrollment surveys. To illustrate, in 1985 officials at Bell & Howell's DeVry chain of proprietary technical colleges decided to limit their reports of enrollment to a single ABET-accredited electronics engineering technology curriculum, eliminating reports on several other technical programs that had been included in DeVry's reports for 1983 and 1984. This decision resulted in a drop of nearly 16,000 students in EMC's count of 1985 enrollment at the bachelor's level in programs in engineering technology! The drop represents a tightening of reporting standards on DeVry's part, rather than an actual loss of students to the profession. It also means that EMC's totals for technology B.S. enrollments in 1983 and 1984 were considerably inflated, compared to our current reports. (The statistics in Exhibit 4, below, are *not* affected by this problem, because that tabulation considered only ABET-accredited programs.)

Another type of inconsistency in the collection of data on engineering technology enrollments has to do with the classification of students in either associate or bachelors programs in those cases where a school offers both types of training. Some schools treat all first and second year technology students as candidates for the associate degree; in these cases, reports on enrollments for the bachelor-level programs show no first or second year students. Other colleges with both types of programs separate students into those seeking associate or bachelor degrees as soon as they are enrolled, so their reports do provide separate estimates of first and second year enrollment for the four-year programs. Neither approach is wrong; EMC accepts either type of response. The inconsistencies do complicate any attempt to assess trends in technology enrollment, particularly when particular schools shift their approach to reporting enrollment from one year to the next.

OTHER NOTES

A listing of the symbols and abbreviations used in this report is provided in Exhibit 3. A tabulation of historical data from EMC's surveys of opening Fall engineering technology enrollments between 1975 and 1985 is provided as Exhibit 4. For reasons outlined above, these data should NOT be regarded as comprehensive or precisely comparable from one year to the next.

Nomenclature for program titles in the curricula tabulations adheres closely to the actual terms used by the responding schools. Common abbreviations and other titling conventions have been imposed, however. In general, EMC attempts to provide a degree of consistency in the labels used for programs, to facilitate identification of similar curricula, without eliminating distinctions that are important to engineering educators. Queries regarding the course content or other particulars of specific engineering technology programs should be directed to the responding institutions and not to EMC.

For the convenience of users, the two volumes of *Engineering and Technology Enrollments—Fall 1985* are available separately or as a set. Please address your orders to the AAES Publications Department, 415 Second Street, N.E., Washington, D.C. 20002.

Exhibit 3

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

Program-level ABET Accreditation Codes: In the curriculum tables provided in this report, each program is tagged as to its status with The Accreditation Board for Engineering and technology (ABET). The codes are:

B = ABET-accredited, at bachelor degree level
M = ABET-accredited, at masters' level (such accreditations are being phased out.)
A = ABET-accredited, at associate degree level (used only in technology tables.)
N = Not ABET-accredited.

School-level Accreditation and Control (AC) Codes: These appear after each school's name. The first digit is an accreditation code with the following meaning:

1 = At least one engineering curriculum accredited by ABET (1985 list, which was applicable for these programs at the time of the survey.) Used only in the engineering degree tables.
2 = At least one technology curriculum accredited by ABET (1985 list). Used only in the technology degree tables.
4 = Accredited by a regional accrediting commission.
5 = Accredited by NATTS.
6 = None of the above.

The second digit indicates control of the school according to the following code:

1 = Public—state or local government control
2 = Public—federal government control
3 = Private—non-profit, non-sectarian
4 = Private—religious
5 = Private—proprietary

An asterisk (*) appearing next to the "AC" Code indicates that 1984 data has been used as the best estimate for 1985, as indicated above in the discussion of substitutions and estimates.

Engineering Degree Categories:

The following abbreviations are used in the tables:

AER	Aerospace & related
AGR	Agricultural
ARC	Architectural
BIO	Bioengineering
CER	Ceramic
CHE	Chemical
CMP	Computer
CVL	Civil, Construction
ELC	Electrical, Electronic
ENS	Engineering & Applied Science
ENV	Environmental
GNL	General
INM	Industrial, Manufacturing, Engineering Management
MAR	Marine
MEC	Mechanical
MGN	Mining, Mineral, Geological
MTL	Materials & Metallurgical
NUC	Nuclear
PET	Petroleum & Natural Gas
OTH	Other
SYS	Systems

Engineering Technology Degree Categories:

A different set of abbreviations is used:

ACN	Air Conditioning, Heating, Refrigeration
AER	Aeronautical, Astronautical
ARC	Architectural
AUT	Automotive
CHE	Chemical
CVL	Civil, Highway, Surveying
CON	Construction
CMP	Computer
DRF	Drafting, Design
ELC	Electrical
ELM	Electromechanical
ELX	Electronic
ENS	Engineering Science
GNL	General
INM	Industrial & Manufacturing
MAR	Marine
MEC	Mechanical
MGN	Mining, Metallurgical, Welding
MTL	Materials
NUC	Nuclear
OTH	Other, e.g., 2-Yr or Pre-Engineering, Agricultural, Bioengineering, Environmental

Exhibit 4

HISTORICAL SUMMARY, 1975-1985
ENGINEERING TECHNOLOGY PROGRAMS ACCREDITED BY ABET*

Engineering Technology Students	Fall 1975	Fall 1976	Fall 1977	Fall 1978	Fall 1979	Fall 1980	Fall 1981	Fall 1982	Fall 1983	Fall 1984	Fall 1985

TOTAL PART-TIME STUDENTS	21,476	19,429	14,079	16,949	15,271	17,395	16,639	13,442	24,134	21,341	18,781
Number of Schools***	112	119	135	133	150	166	161	154	161	161	157

*Data up to and including 1978 represent all enrollments in schools with at least one engineering technology curriculum accredited by the Accreditation Board for Engineering and Technology at the time of the survey. Data for 1979, which first used the new format, identify enrollments in engineering technology *programs*, accredited by ABET.

**Includes students in both associate and bachelors' degree programs for these years.

***Schools with at least on curriculum accredited by ABET. The Pennsylvania State University Commonwealth Campuses are counted as one institution. In 1985-86, 34 additional schools had ABET-accredited programs but were not included in this survey.
